## ROMIN EVO COMP w/ MIMIC

3 cards

## Subject Information

3 cards

### Specialized Mission Statement

Since 1974, we've had one goal:  
*Innovate and inspire to improve riders' lives*

### Technical Size and Composition

- Mis 168mm / 257g
- Medium density level 2 padding
- Carbon fiber rails

### Material Color/ Texture

- Matte black mostly absorbent of light with reflective lighter dots on the nose of the saddle. More lucid (reflective) material on the rails and the rear bridge of the saddle

## Lighting and Background

2 cards

### Background

Board background but with the set positioned a meter or two away to make the background not super present.

### Lighting

forwards light positioned to the upper left of the image well above the subject (shadow is almost directly below). Glass pane was likely added after (in post production). Strip light likely had a grid to make it less harsh on the top of the shoe.

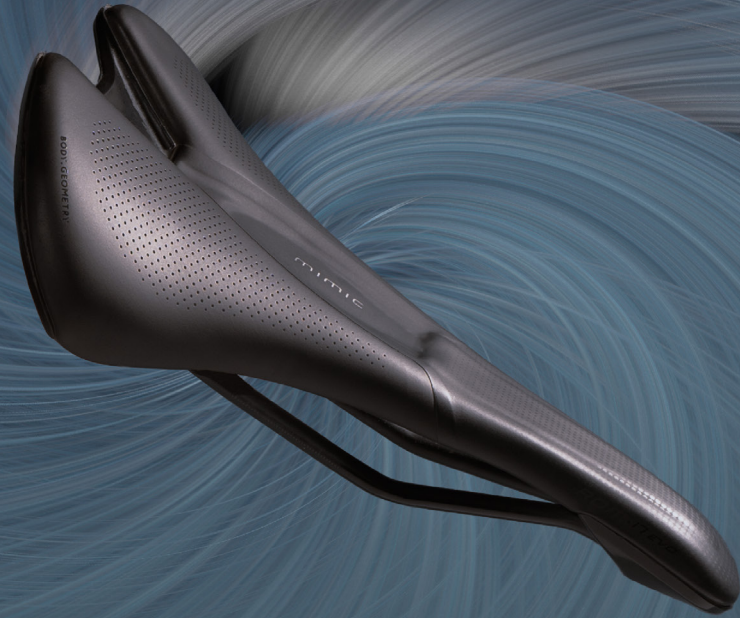

Secondary strip light might have been placed on the background to aid to the composition of the image?
